Paperwork Burden Statement

According to the Paperwork Reduction Act, as amended, no persons are required to respond to a collection of information unless it displays a valid OMB Control Number. The valid OMB control number for this information collection is 0348-0061. Public reporting burden for this collection of information is estimated to average 1.5 hours per response, including time for reviewing instructions, searching existing data sources, gathering and maintaing the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Office of Management and Budget, Paperwork reduction Project(0348-0060). Washington, DC 20503.

Activity: Kane County Facility Audits
Quarter: 07/01/2010 - 09/30/2010
Status: Active

Metric Activity: Building Energy Audits
% of Work Complete: 100

Activity Description:

Goal Supported: To conduct audits of five or more Kane County facilities and create a list of priority energy efficiency improvement projectsProgram Description: Kane County seeks to retrofit one or more County-owned facilities with updated and energy efficient systems to reduce long-term operating costs, reduce energy consumed, and serve as an example to other county and municipal entities in Northeast Illinois. The project will consist of several phases, including:* Facility audits: Kane County will work with the Illinois Department of Commerce and Economic Opportunity's Smart Energy Design Assistance Center (SEDAC) to leverage State Energy Program funding and conduct audits of County facilities. Additionally, pro-bono and reduced rate private sector audits of Kane County facilities will be pursued to complete the portfolio of Kane County facility improvement possibilities. * Development of a suite of potential energy efficiency improvements: Using Kane County facility audit information, staff will create a list of projects which meet current and future facility upgrade needs and energy reduction goals.* Prioritization of improvements: Kane County will develop a list of priority energy efficiency improvement projects based on potential energy savings, level of replacement need, and other energy efficiency and conservation goals.

Activity: Update Kane County Energy Plan and Energy Efficiency Documents REV 1
Quarter: 07/01/2010 - 09/30/2010 Metric Activity: Technical Assistance
Status: Active % of Work Complete: 45

Activity Description:

I. Project Description: Update the Kane County(KC) Energy Plan developed in 2005 and the Energy Efficiency Chapter of the KC 2030 Land Resource Management Plan adopted in 2004. The project cost total is $43,000 and will come from Kane County's EECBG allocation.The update of the KC Energy Plan will be conducted by staff from the KC Development Dept. with assistance from a consultant chosen by the Development Dept. The update of the Energy Efficiency chapter of the 2030 Land Resource Management Plan will be conducted by staff using data from the updated Energy Plan. EECBG funds will be used to cover the cost of part of one full-time staff person and a consultant. The Energy Plan was originally developed in 2005. Once adopted by the Kane County Board, the Energy Plan will be integrated into the future 2040 Land Resource Management Plan. Our goal is to complete the Energy Plan within one year of the effective date of our award.Kane County will also collect data on Kane County Facility and Operations Energy Use, and will develop a report with suggestions for internal Kane County Facilities and Operations to reduce Energy and resource consumption. This data and report will serve as a baseline for a future production of a Kane County Sustainability Plan.

Activity: Transportation Long Range Comprehensive Plan; Microsimulation and Corridor Analysis REV
Quarter: 07/01/2010 - 09/30/2010 Metric Activity: Transportation
Status: Active % of Work Complete: 25

Activity Description:

Kane County Division of Transportation, as part of the Long Range Comprehensive Planning Process, will carry out a Microsimulation and Corridor Analysis for the Randall Road corridor to determine the extent to which bus rapid transit, improved transit, and corridor land use densification will reduce vehicle miles traveled per capita, improve air quality and improve the efficiency of Kane County's transportation network. The Randall Road corridor is classified as a Strategic Regional Arterial, carrying nearly 60,000 cars per day and is the one of the main north south corridors in Kane County. It also serves as a major regional economic corridor with a 2008 ADT of nearly 60,000 cars per day. The study will investigate the relationship between land use densification and the transportation mode split and measure the resulting changes in congestion and air quality.Kane County will utilize a Transit Committee as the steering committee which will provide input and critical review of the study's deliverables. The transit committee will consist of members from Kane County, the Regional Transportation Authority, Pace and Metra, representatives from major employers and the municipalities along the corridor.The County is currently undertaking a study along the Randall Road Corridor to investigate infrastructure improvements that will support the existing transit fixed-route services along the corridor. This study will look beyond improvements within the roadway right-of-way and investigate the impact of land use/smart growth principles and the make observations on the expected increased use of alternative modes of transportation, decreased use of the single occupancy vehicle and increased liveability/walkability within the corridor. This study will also feed into the update of the County's Long Range Comprehensive Plan. It is expected that findings from this plan will provide stakeholders and policy makers the justification needed to make changes to existing zoning ordinances to improve and provide sustainable and transit supportive future land use patterns.

QUALITATIVE DESCRIPTIONS

Reporting Period: 07/01/2010- 09/30/2010

Are you following the Plan? If not, describe the change in approach, and reasons for the change.
Yes
What we expect to accomplish during the next period
We will hold a workshop for all of the municipalities and their staff, the three hospitals, the RTA and PACE and METRA, and continue to identify opportunities in the corridor , and create the vision of a potential BRT system and land use possibilities along the corridor to model the potential benefits of a BRT system.
Lessons Learned
None
Major Activities, Significant Results, Major Findings, and Key Outcomes
We met with representatives from most of the municipalities along the corridor and educated them on the land use and infrastructure requirements and the benefits of BRT. Conducted a corridor conditions analysis, completed the BRT Primer document and reviewed potential opprotunities along the corridor.
What we planned to accomplish this period
Project kick-off, and work on the BRT primer and corridor visioning components. Workshop/meeting on BRT for corridor mayors.

Activity: Revolving Loan Fund for Public and Nonprofit Energy Efficiency Improvement Projects REV 1
Quarter: 07/01/2010 - 09/30/2010 Metric Activity: Loans and Grants
Status: Active % of Work Complete: 30

Activity Description:

Our proposed Revolving Loan Fund for Public Sector and Non-Profit Energy Efficiency Improvement Projects will provide eligible local government and non-profit organizations with improved technology and financial assistance to implement energy efficiency upgrades to their buildings. The Fund will be set up and managed by the Kane County Development Department and initially capitalized through EECBG funding. Low interest rate loans will be provided to assist the applicants in financing their energy cost reduction efforts. The Fund will be initially capitalized through EECBG funding. The Kane County Development Department will provide staff support. The Fund's revolving loan mechanism will allow borrowers to repay loans through the stream of cost savings that will be realized from approved energy efficiency projects. The Revolving Loan Fund for Public Sector and Non-Profit Energy Efficiency Improvement Projects will provide a long-term solution to rising energy costs for eligible applicants. It will provide technical and financial assistance to implement cost-effective energy efficiency upgrades. All of the projects implemented will be repaid from targeted savings generated by energy efficiency capital improvement projects. Eligible measures include, but are not limited to: energy efficient lighting systems, high efficiency heating, ventilation and air conditioning systems, energy management systems, re-commissioning, building shell improvements, and load management projects. Interest earned and any interest that is generated from a loan repayment will be deposited into the Fund account and used to sustain the Fund. The payback time for each loan will be determined on a project by project basis with a maximum time of five years. Revolving Loan Funds will be distributed to selected recipients after review of applications submitted during a designated application period. The Revolving Loan Fund for Public Sector and Non-Profit Energy Efficiency Improvement Projects proposes the following series of steps to ensure accountability:1. Project is submitted by application and initially approved by Kane County Development Department staff and/or the Energy and Environmental Technology Committee of the Kane County Board.2. Initial Building Assessment is completed and signed by a licensed engineer.3. Detailed report is required of the submitting client. Loan repayment amounts and schedules are verified and agreed upon. 4. Project is monitored by on-site visits, and a final inspection is required. 5. Project is approved and loan repayment begins. All contractors or bidders must be competitively selected.

Activity: Kane County Facility Efficiency Improvements
Quarter: 07/01/2010 - 09/30/2010
Status: Active

Metric Activity: Building Retrofits
% of Work Complete: 40

Activity Description:

Goal Supported: To implement measures to maximize energy efficiency improvements at Kane County FacilitiesProgram Description: Kane County seeks to retrofit one or more County-owned facilities with updated and energy efficient systems to reduce long-term operating costs, reduce energy consumed, and serve as an example to other county and municipal entities in Northeast Illinois. The project will consist of several phases, including:* Bid Phase & Assistance Procurement: Kane County will develop bid documents to procure competitive bids for implementing energy efficiency measures prioritized by audits in separate activity.* Implementation of improvements: Kane County will utilize the funds under this program budget to implement energy efficiency improvements as prioritized.

ENERGY EFFICIENCY AND CONSERVATION BLOCK GRANT (EECBG)
PROGRAM PERFORMANCE REPORT

Grant Number: EE0000818 Final Report: ☐ Grantee: County of Kane

Activity: Improvements to Kane County Division of Transportation Intelligent Transportation System REV
Quarter: 07/01/2010 - 09/30/2010 Metric Activity: Transportation
Status: Active % of Work Complete: 25

Activity Description:

Project Description:Kane County Division of Transportation will implement improvements to Kane County's Intelligent Transportation System (ITS), which may include the Expansion of the Fiber Optic Interconnect Network from County highway and road segments to a KDOT facility, various field devices such as roadway weather systems and dynamic message signs, and central office traffic management systems for an Arterial Operations Center to aid in real time management of traffic and maintenance operations. The construction of additional facility space for an Arterial Operations Center will be funded by fund sources other than EECBG. The above proposed improvements are components of a larger project scope, which includes already completed projects/existing ITS infrastructure as outlined in the County's overall ITS Strategic Plan as recommended in The Kane County Intelligent Transportation Systems (ITS)/ Traffic Management Center (TMC) Feasibility Study (2007) as well as the Kane County Long Range Transportation Plan.

Status: Active % of Work Complete: 25

Reporting Period: 07/01/2010- 09/30/2010

Are you following the Plan? If not, describe the change in approach, and reasons for the change.
Yes
What we expect to accomplish during the next period
Continue design engineering for the AOC project. Bid the Orchard and Randall Road ATMS projects. Begin construction for the RWIS projects.
Lessons Learned
None
Major Activities, Significant Results, Major Findings, and Key Outcomes
None
What we planned to accomplish this period
Approval of materials and start of procurrment for RWIS/Warning Beacon project. Begin AOC feasibility study and interconnect design for the AOC & Burlington Rd./IL 64 interconnect project.
Actual or Anticipated Problems or Delays and Corrective Action Plan
Unanticipated delay for approving all materials for the RWIS project due to unavailability of required percentage of domestic materials ("Made in the US"). As a plan of corrective action, we plan to request a variance for the DOE to allow the submitted materials to be used on this project.
Products Produced or Technology Transfer Activities Accomplished During the Reporting Period
None
Remarks

Activity: Kane County, Illinois Energy Efficiency and Conservation Program Administration REV
Quarter: 07/01/2010 - 09/30/2010 Metric Activity: Other
Status: Active % of Work Complete: 45

Activity Description:

Goal Supported: To successfully administer the Kane County, Illinois Energy Efficiency and Conservation Programs with on-time reporting and accurate financial tracking and management. Program Description: Kane County staff will submit timely reports, provide financial tracking, coordinate program goals, timelines, and documentation, and communicate with Department of Energy. This activity will consist of several phases, including:* Project Startup: Track EECBG application materials; register Kane County in necessary federal programs and websites to ensure eligibility and access to application materials; coordinate staff and elected officials to develop suite of programs for Kane County's Energy Efficiency and Conservation Program; submit application to EECBG program; follow up through project award* Project Management: Track Kane County Energy Efficiency and Conservation programs; coordinate staff to compile and submit timely quarterly reports; coordinate staff to assist with financial management of programs including contract procurement, DOE contract approval, subcontract invoicing, grant reimbursements, and analysis of leveraged fund opportunities; oversee compliance with ARRA and grant requirements; manage communications with Waste Management and other firms for research into methane capture and power generation program; provide general program support and staff assistance* Project Conclusion: Ensure grant funds expended in timely manner; coordinate staff to compile and submit a timely final report

Activity: Building Trades Energy Efficiency Training Program
Quarter: 07/01/2010 - 09/30/2010
Status: Active

Metric Activity: Workshops, Training, and Education
% of Work Complete: 30

Activity Description:

Goal Supported: To train forty or more building auditors, building inspectors, building code developers/enforcers, contractors, or tradespeople in advanced energy efficiency and conservation building techniquesProgram Description: Kane County, together with the cities of Aurora and Elgin, will establish a regional training program to promote sustainable, energy efficient building techniques. The training program will be offered at reduced rates to builders and contractors located in Kane County. The program will promote energy efficient and energy conserving building and systems design and construction.The training program will focus on one or more sectors of the building industry:* Training for building energy efficiency auditors. This training will consist of courses through a local community college for professionals entering the field of energy efficiency building auditing, or wishing to further their knowledge and expertise in various building systems.* Training for municipal/county building code officials and building inspectors. This training will consist of short seminars or workshops aimed at furthering the understanding and application of building efficiency as it applies to code development and inspections.* Training for general contractors and building trades professionals. This training will consist of courses through a local community college for contractors and tradespeople to develop a solid working knowledge of energy efficient building techniques and building systems.These courses may be combined and may lead to a certification, enabling contractors, auditors, and others to gain market advantage and penetrate building efficiencies deeper into the renovation and new housing markets.Funds for this program will be applied toward course development, program coordination, marketing, and discounted tuition rates for professionals in Kane County.

QUALITATIVE DESCRIPTIONS

Reporting Period: 07/01/2010- 09/30/2010

Are you following the Plan? If not, describe the change in approach, and reasons for the change.
Yes
What we expect to accomplish during the next period
Continue enrolled students through first semester of Energy Efficiency Training Courses. Recruit students for group to begin training in second semester.
Lessons Learned
None
Major Activities, Significant Results, Major Findings, and Key Outcomes
The first semester of training programs has begun. Elgin Community College recruited 11 students to begin its training certificate program, and all 11 are enrolled and taking three once-weekly courses.
What we planned to accomplish this period
The first semester of training programs will begin, Elgin Community College will recruit ten students to begin its training certificate program.
