Annual Routing and Crack Seal Program Scheduled to Begin This Week

June 22, 2026 - The Kane County Division of Transportation (KDOT) is scheduled to begin its Annual Routing and Crack Seal Program during the week of June 22, 2026, weather permitting.

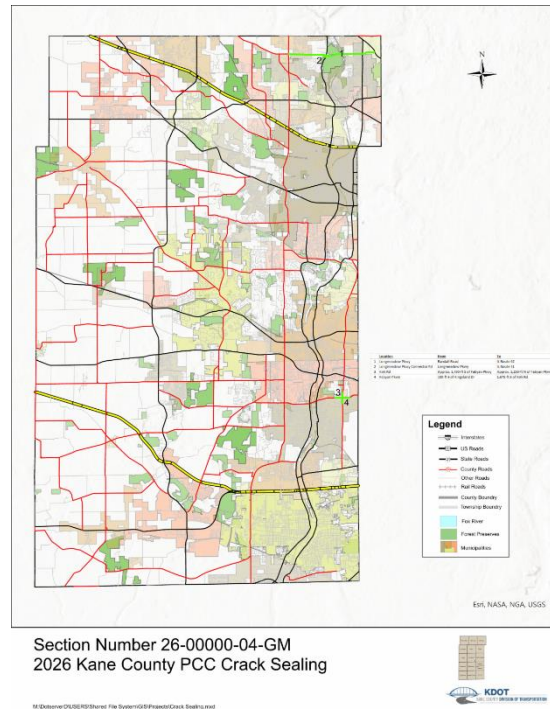

The Crack Seal Program is part of the County's ongoing roadway maintenance efforts to help extend pavement life by sealing roadway cracks. This preventative maintenance treatment helps prevent water from penetrating the pavement structure and protects roadways from freeze-thaw damage during the winter months.

Work is scheduled to occur Monday through Friday between 8:00 a.m. and 4:00 p.m. Crews will progress from one roadway segment to another throughout the project as work is completed on the following roads:

- Longmeadow Parkway
- Longmeadow Parkway Connector Road
- Kirk Road
- Fabyan Parkway

All listed roadways will remain open during construction; however, temporary daily lane closures will be necessary, and traffic may be reduced to a single lane with the use of flaggers.

The project is anticipated to be completed within approximately six to eight weeks, weather permitting.

Visit our [Traffic Advisories](#) webpage for more information on road closures, detours, and active KDOT projects.

*Motorists should expect delays while traveling through the work areas, consider alternate routes and expect additional commute time. Motorists are asked to reduce their speed, watch for construction workers and vehicles entering and leaving the site and obey flaggers and traffic control devices. **It is illegal to talk or text on a cell phone while driving.***
