Keslinger Road Box Culvert Extension and Guardrail Removal Begins June 9th

June 4, 2025 - Culvert repair work is scheduled to begin on Keslinger Road near the east entrance to Kaneville High School the week of June 9th, weather permitting. The planned work will consist of the extension of the existing concrete box culvert, guardrail removal and regrading/shaping of the existing ditches.

While the Kaneville High School's east entrance will remain open during construction, the right turn lane into the east entrance will be closed in order to provide a safe work zone for the workers. Westbound traffic wanting to utilize the east entrance will need to turn right from the westbound through lane. The anticipated project should be completed by the end of July 2025, weather dependent.

Visit our [Traffic Advisories](#) webpage for more information on road closures, detours, and active KDOT projects.

*Motorists should expect delays while traveling through the work areas, consider alternate routes and expect additional commute time. Motorists are asked to reduce their speed, watch for construction workers and vehicles entering and leaving the site and obey flaggers and traffic control devices. **It is illegal to talk or text on a cell phone while driving.***
