May 16, 2008

PRESS RELEASE

Construction is scheduled to begin on the bridge that carries Jericho Road over Big Rock Creek the week of May 19, 2008. Initial work will begin with daily lane closures and traffic will be controlled by flaggers. Then shortly after Memorial Day the eastbound lane will be closed and travel will be limited to one lane over the bridge. Traffic flow will be controlled by temporary traffic signals. The improvements consist of a new concrete wearing surface, guardrail replacement and various erosion control measures. This work is scheduled to last until late July 2008. Motorists are asked to be alert to the changing lane configurations and exercise caution in the construction area.

Any questions or concerns may be directed to Chris Kaufmann of the Kane County Division of Transportation (630) 208-3138
