Subject: EX: Petition - TNT Howard Solar Facility

This email is to petition the zoning and building of any Solar field in the existing fields close to the West side of Almora neighborhood in Elgin, IL 60124.

Why does the placement of this solar field need to be next to residential when there are many other areas nearby Kane county more suitable or was usage of a brownfield considered? My concerns are listed below and I am located right next to where "TNT Howard" is looking to build. The facility will be against my backyard of the home we purchased in 2023. One of the reasons we made the decision to buy a home on Almora Terrace in Elgin was due to the neighborhood. It's quiet with no commercial development.

- Noise day and night when we already have noise from Randall
- Light pollution at night (currently dark at night)
- Buzzing/Noise from electrical (currently quiet minus road noise, diminished at night)
- Traffic on highland and potential driving behind our home day and night by commercial vehicles
- Property value decreased long and short term
- Curb appeal
- Effects on wildlife behind our home
- Glare from panels, builds, equipment and glass
- Pollution from building
- Reduced privacy
- Perception issues from future buyers concerned with future zoning
- Visibility
- Possibility negative effects or needed cell reception
- Tax increases

Kind Regards,
Calvin D Taylor
