Hi Natalie , I am writing this email account of my concerns. First property value , then comes the site as I look in my backyard of 20 feet tall steel holding the solar panels will look very bad. I built this house because I was told that it's farm land behind me and zoned F . Now 25 years later this guy Tim takes all the trees down and burns them for six months you couldn't breath. This guy only cares about bottom line Money. If he would have left the trees there would have been a buffer . I am currently looking at building a new house in west highland acres but are very concerned that ugly solar field I might have to look at. How would the Kane county board like it if they were trying to rezone your back yard and wanting to put in a solar field. Please shut this thing down. Jerry Martinez. [REDACTED]
