Dear Kane County Board and Zoning Office:

As part of the environmental review for the proposed 2.7 MWac community solar project located in Plato Township, Kane County, Illinois known as Zoning Petition 4664, the project site has been assessed for the presence of jurisdictional wetlands and Waters of the U.S. (WOTUS) under the Clean Water Act via a Level 1 Wetland Delineation, which was submitted as Document 30 of the application.

At this time, we have determined the need for a level 2 wetlands delineation and are coordinating with the U.S. Army Corps of Engineers (USACE) and plan to complete these items in the fall of 2025.

All required documentation and agency coordination will be completed prior to building permit issuance. The project will fully comply with all applicable federal, state, and local environmental regulations, including those under Section 404 of the Clean Water Act. Additionally, we will adhere to all wetland, drainage, and stormwater requirements established by Kane County and any other relevant jurisdictions. Best management practices will be employed as necessary to prevent any off-site impacts and ensure protection of nearby environmental features.

Please feel free to contact us should you require additional information or documentation.

Sincerely,  
Nadeem Demian  
Development Manager
