

2 trucks always behind
GARAGE -
1 TRUCK NO WORKING

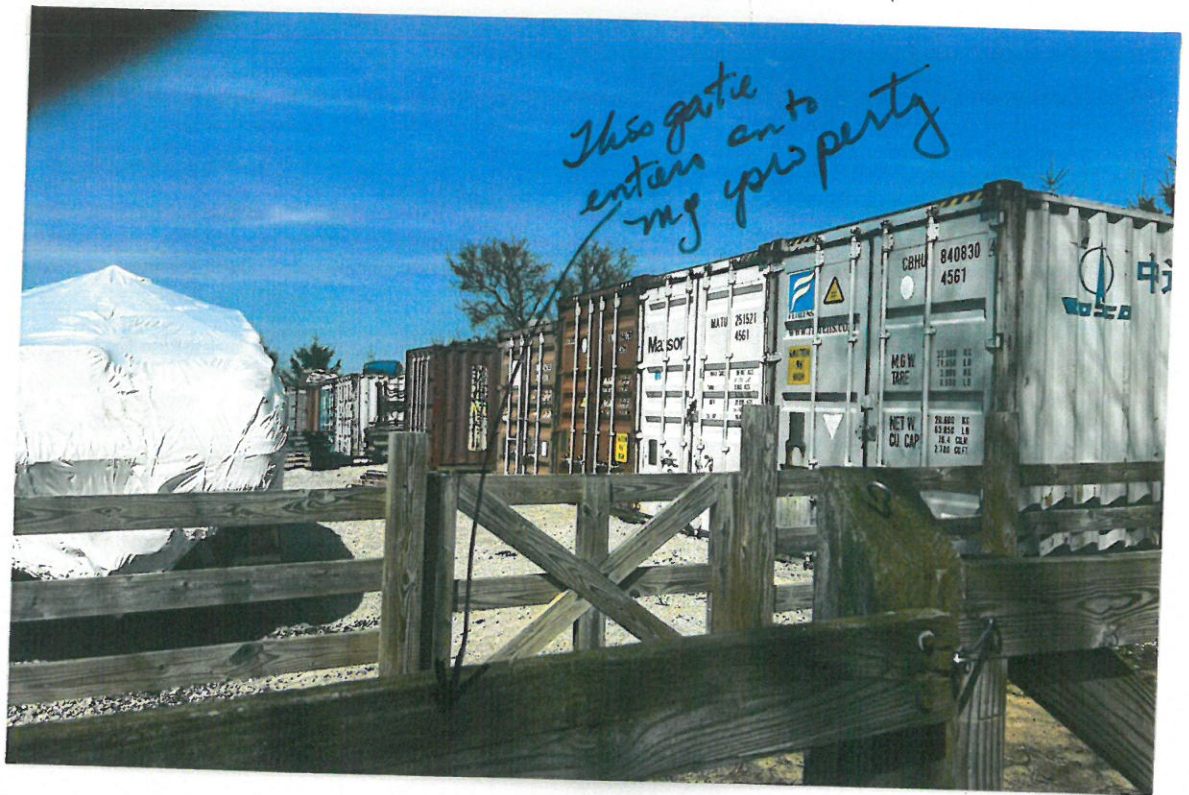

Trucks parked by hind garage
not in work area.
Possible diesel fuel leak.

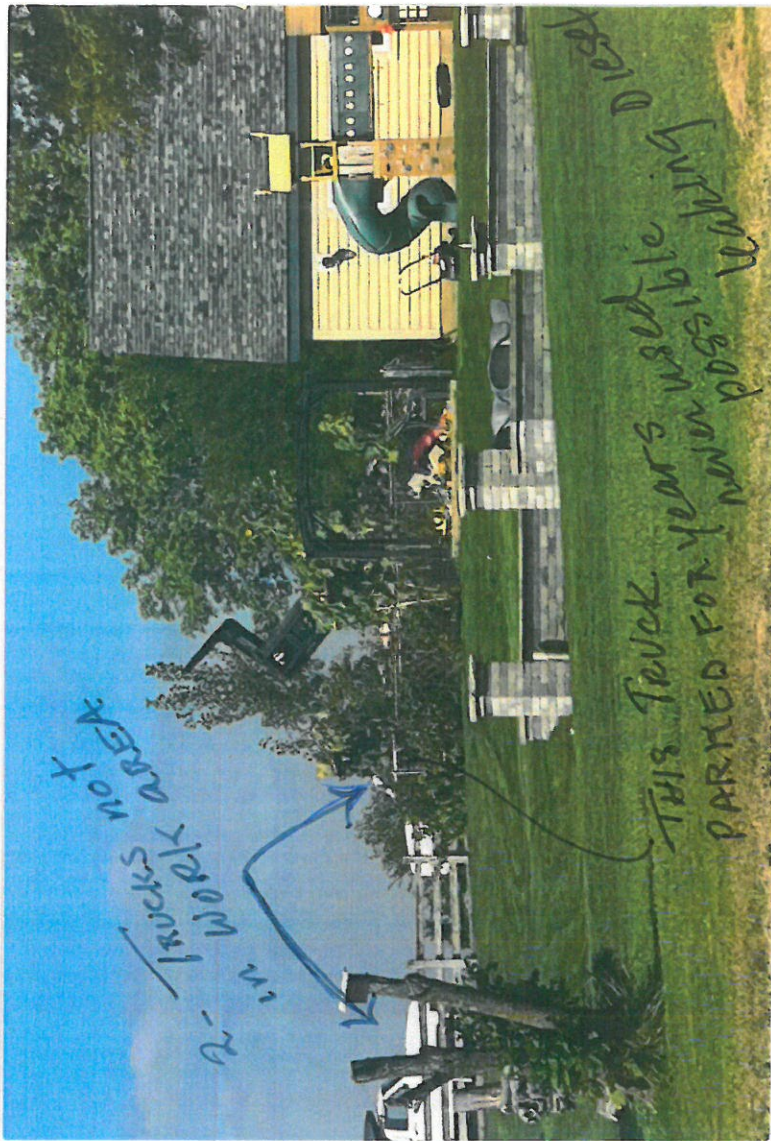

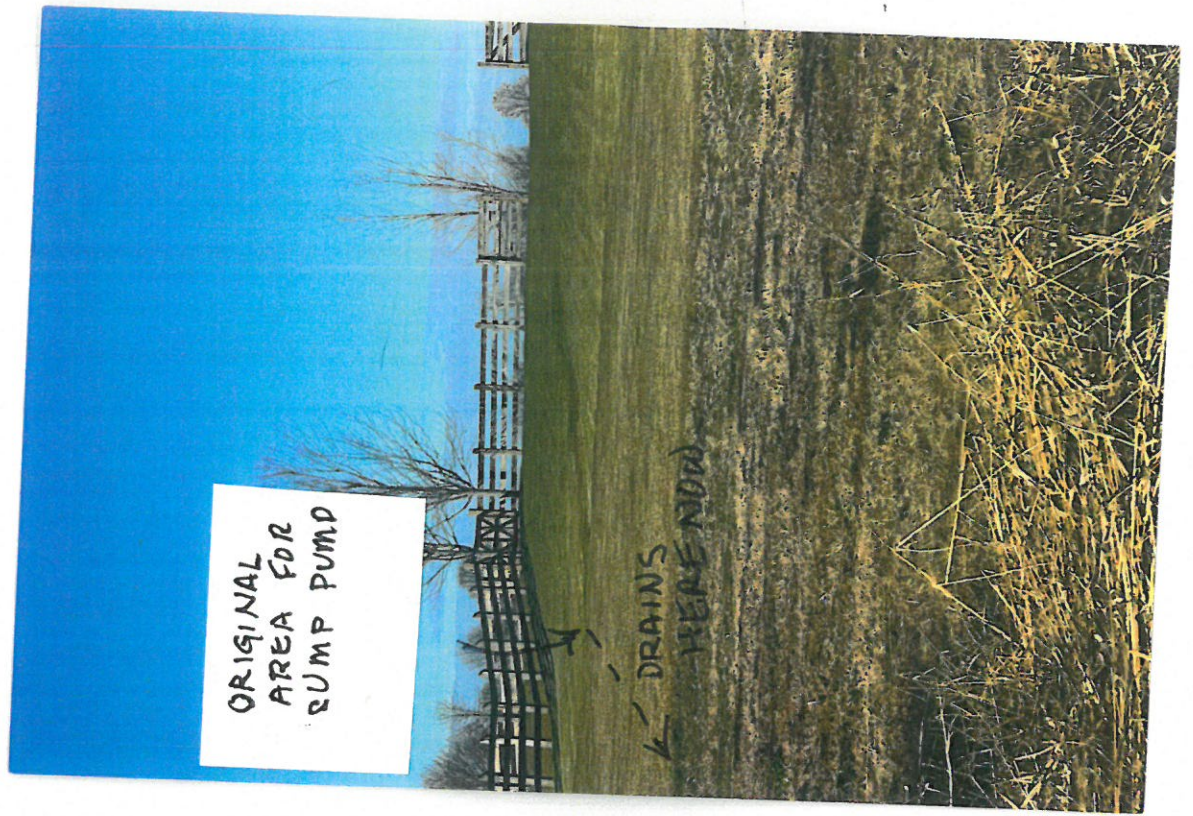

Everytime I walk back here

its a mess

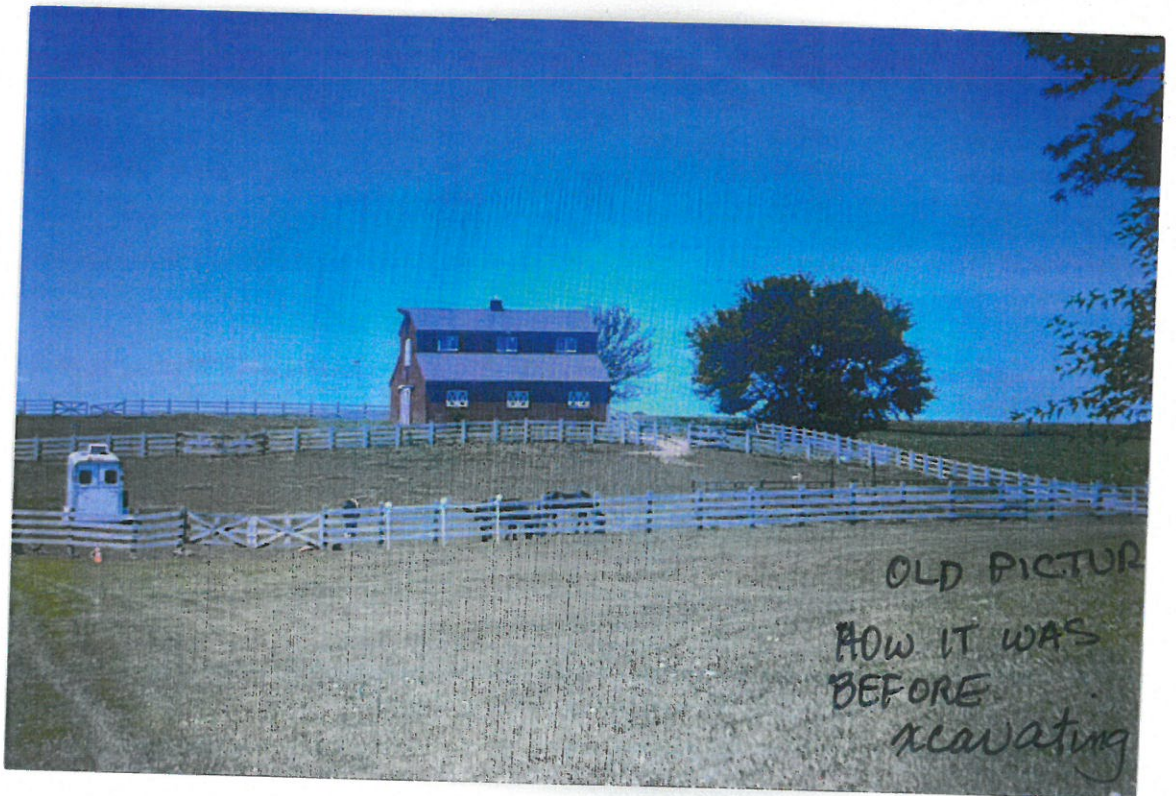

ORIGINAL

June 2019

1
Damage done to our property
due to Business driveway -

From 2016-2023 - we were completely
flooded year round - 7 years.

We had no access to our back 3
acres without asking neighbors to
get to the back.

The trees were inundated - sat
in water and now dead.

The ground has so many ruts
and holes - its difficult to cut

2
Special Use Permit

The Special use permit was issued
for 5 years only.

Quote from Village of Algonguin
signed by Russel Farnham.

"Property is in the critical
protection area of Woods Creek
~~Plan~~ Watershed plan. Question
is there diesel - paint - or any type
of contaminants in those
shipping containers?"

Additional landscaping to be required for screening on west and North side - I walk our property every week - I'm on the South side - So where is the landscaping on the North Side -

That was never put in
 an was on the ~~Legal~~ Paperwork
 for the ~~the~~ Original Permit

If he leaves it a mess I
 want screen on South side too

Also the Village of Algonquin states

"It should be clear that at the end of 5 years - this special use permit is terminated. There should be no opportunity to continue the use beyond this time frame" unquote
 written Sept. 19, 2014

KPASS Zoning Request

Pet. 2016-4398 States

"Property is currently in the County's
ADJUDICATION program for the violation
of storing construction business equipment.
NO MORE THAN

States: 3 truck and trailers,
4 shipping containers, and again
putting up screening

So they have 3 TOPLINE TRUCKS - PICKUP TRUCK
10 shipping containers - 1 or 2 trailers + BOATS

The new Special Use Permit says
there are no homes within 1,000'
but Johnston's house is 170' from
work area

all three houses are less
than a 1,000 feet.

So what's not true is we
are not 1,000 feet away

The Original ²⁰¹⁶ On the Findings of Fact Sheet ^{7.}
Patti wrote on question #9

No need of electricity ^{you} is already there. no need for additional utilities -"

Lets talk gas line - there was never a gas line at the barn but someone put a gas line in - dug it 4-6" deep - and I'm not sure if it goes to Barn or shipping containers. Lets talk cedis. - a gas line S/B 18-24" deep - Scarey moment when I & L drain

tile guy Broke the gas line. It was over 90° that day and Jeff was working so hard by himself - That could of exploded and you were probably wondering why I don't feel safe.

They have 18 wheel ~~less~~ Trucks
 back up into drive - they R
 Loaded - Stopping traffic
 and crushing drain tile
 There were 6 trucks in
 1 day!

In conclusion -

If you give Karwowski's
 a 2nd Special Use Permit
 you only Reward PAST
 NON COMPLIANCE

Any of you have an open
 invitation to come to my house

and another thought

Excavating on a watershed
near Woods Creek poses
a significant risk of
contaminating the water.

Sedimentation ~~excess~~
thrown into the water

multiple

There's code violations all
over there property —
