Subject: EX: Request for Special Use Permit for Private Airstrip: 40W778 Norris Road, Sugar Grove, Illinois 60554

Mr. Giordano,

The State's Attorney's Office (SAO) has completed their right-of-way review and informed me that they located the township order from 1855 establishing Norris Road in accordance with Illinois law as a public highway with a width of 4 rods (66'). This also meets the minimum width established by law for township public highways. As such, the SAO's has informed me that the width of the Norris Road right of way is already (4) rods or sixty six feet (66') as required by Illinois law.

Therefore, no easement or right-of-way will be recommended by KDOT staff as part of the Special Use application since the half right-of-way is already thirty three (33'). I will make sure that the Development Department and the Development Committee Chair are aware of this information.

Sincerely,
Tom

Thomas B. Rickert, AICP CTP
