

**INCREASE IN KANE COUNTY FORECLOSURE DOCUMENTS**

### **16th Circuit Court Gang Task Force**

The Kane County Regional Office of Education has been represented on the gang task force for the past nine years through attendance at monthly meetings and by partnering with professional development programs for educators, juvenile court services personnel, Juvenile Justice Center personnel, and law enforcement. This partnership has helped to build bridges between professionals that serve "at-risk youth" in our region. Gang task force members yearly provide professional development for county-wide teacher institute day programs on gang-related topics, the probation process as it relates to schools and gang influence on society. This year the gang task force, the ROE, and School District #303 sponsored the renowned Lt. Colonel David Grossman for a highly-rated, full-day presentation on "The Culture of Violence in Our Society" for 390 law enforcement officers, court services personnel, educators and members of the community.

*"Every choice you make  
has an end result."*

*~ Zig Ziglar*

### **Spelling Bee**

In cooperation with the Scripps Howard National Spelling Bee and our local sponsor, the Kane County Chronicle, the ROE is proud to coordinate the Spelling Bee for our Kane County public and non-public schools. At the beginning of each school year, all schools that register with Scripps to participate have individual school Spelling Bees. The winners' names are reported to the Kane County Regional Office of Education. The regional Spelling Bees are scheduled to take place in February. The winners from the regional bees have a final competition in March before one winner from Kane County proceeds to the Scripps National Spelling Bee in Washington D.C. in May. The local and regional Spelling Bees are coordinated and funded by the Regional Office of Education.

### **Association for Individual Development (AID)**

The Association for Individual Development serves physically and mentally handicapped individuals within the region and beyond. The ROE hosts their regularly-scheduled board meetings.

Age: 71  
Height: 6 feet  
Weight: 199  
Health: Excellent

Political and/or business references available upon request.

# the NACRC Bulletin

VOLUME 14 ISSUE 3 SUMMER 2010

## From the President

It has been my pleasure working with Kay Wrucke and I thank her for an outstanding year as president. Her guidance took us to a new level of professionalism within the association; we were fortunate to have her exceptional leadership.

Looking forward I trust we can work collaboratively toward building NACRC into the most passionate, proactive and pragmatic government association in the country. It is my privilege to serve as this year's president.

To further our collective goals, some of the objectives I feel we need to build upon are:

- Recruiting and retaining prominent and emerging leaders for the association.
- Increasing membership by encouraging all recorders and elected officials to join NACRC. This can be done by positive word of mouth from each of us whenever the occasion warrants.
- Motivating, equipping and providing opportunities for our members to become involved with the association.
- Making available essential learning through relevant effective education, compelling experiences and power resources. "Empowerment through Education" should be our motto.
- Providing dynamic and accessible forums to advance relationships between county officials.
- Strengthening the visibility of our legislative committee both statewide and nationally.
- Networking and building stronger relationships for tomorrow with members of NACRC as well as with other state and national associations.
- Increasing corporate sponsorship and corporate participation on committees.

# KANE COUNTY CLERK VITAL RECORDS

KANE COUNTY, ILLINOIS

OCTOBER 4, 2010

## VITAL RECORDS YEAR 2008

The year 2008 has brought about many changes in the Vital Records Department.

- This year we converted our birth, death, and marriage records to the new Devnet Program.
- We trained of all Vital Records employees in the various uses of the Devnet program. We do have on going retraining as the program has been changing as we go along.
- The new program went into effect in June. The birth, death, and marriage certificate part of the program is working well. We do have a problem with the old marriage images and some of the birth images; the scan on these documents did not convert the same as what we had in the old program. This is an issue we have been dealing with and Devnet has been working on. We were able to print the marriage certificate from the AS400 until recently, when the program stopped printing.
- The marriage application and license part of the Devnet program has been a continuing challenge, however the program is working better now; with very few system errors. We still have some work to do, but have seen a huge improvement since the first of December.
- We have a new Assumed Name program (created by our IT Department). The new program is more streamline, and we no longer have to hand type the forms or hand write the county number and name of the business in a log-in book. All Vital Records employees have been trained on the use of this program.
- We installed a new Notary program (also created by our IT Department) along with a new signature pad for the scanning in of the notary's name. All Vital Records employees, that would be using the program, have been trained including Tracy doing the scanning's that come through the mail.

### Scanning and Indexing:

- All birth records from 1877 to 1916 have been scanned and indexed.
- We are currently working backwards from book # 145(Sept 1951) to Jan. 1916. As of 11/19/2008 Matt has indexed 9825 (12 Folders, with most containing 820 docs/folder).
- Barb has scanned 2 ½ of these folders.
- Tracy and Matt were trained on the scanning of documents in the Devnet program and both Tracy and Matthew worked with the Cardiff rep on the capabilities of their program.

- For Vital Record's documents; the Cardiff program does seem to be faster as far as reading and scanning the information and would be useful in several different applications. However, the only drawback is the program will not know if a date on a certificate is wrong, spelling; numbering wrong, etc.: These items can only be determined or questioned by a person. For vital records I would never want to give up accuracy for speed. Of course we may be able to have both by implementing a procedure for using both machine and human.
- We also have a new EIS program; and Judy Everhart has been trained.
- Jannine Tollestrup worked with our key personnel assigned to each of the three new programs created by our IT department. Working together we were able to make changes which made all three programs more efficient.

### **Plans for 2009**

- Continue to work with Devnet to improve our marriage application and license program and scanning issues.
- Devnet Receipting – Have efficient and correct program up and running by the end of January.
- Program for Judicial Signatures on marriage license.
- March training of key employees on the State EDRS system.
- Spring – Training all registrars on the EDRS system and implementation of the program. This would include our registrars learning how to file death certificates directly with the State. (This would be for funeral homes and physicians that are not a part of the EDRS system)
- Cross training on all jobs especially the jobs with new programs.
- If new rates are approved, will be making changes to all paperwork, cash register, forms, website, etc. to reflect changes.
- January 2010 the State plans to start the EBRS (Electronic Filing of Birth Certificates by the hospitals): I assume we will be trained before January 2010 on the new system (new security paper, etc.) and how we will be filing home births.
- Continue to index and scan the older birth certificates. Look at a different way to scan and index these documents.

## Vital Records 2009

1. We started the EDRS system in April this year; the system has had some bugs, some of which the State is working on; some they are not. The worst problem is the physicians that have not got on board with the system. Without the physicians on line our work as well as the funeral homes is more time consuming.
2. Continued cross training of employees and training of employees on the EDRS system.
3. We started using State mandated security paper for certified copies of death certificates.
4. The Devnet counter receipting program was implemented and all employees have been trained on the new system.
5. Devnet – Receipting – Updated the program to reflect rate change. Increased Marriage License fee to \$27.00; Notary Service \$1.00; Raffle License \$6.00; Estimate of Redemption \$4.00.

## VITAL RECORDS 2010

1. January 2010 the State implemented the new IVRS system (Previously known as EDRS) to include electronic filing of birth certificates. Along with the electronic filing we started using the State mandated security paper for making certified copies of birth certificates. (The State mandated security paper for births is pink and blue; specifies it is for birth records only and the certified seal is pre-embossed. The death certificate security paper is green and specifies it is for death records only with a pre-embossed certified seal.)
2. We have trained all vital records staff on the IVRS system
3. We implemented an additional payment system for our customers. We now accept most major cards at the counter.
4. We now have pre-embossed security paper for certified copies of marriage license.
5. The US Department of State implemented a new training and audit program for passport agents. All our staff has been trained on the new system. Our office was audited by the Passport agency and received an impeccable review on our procedures, knowledge of policy; customer service; security and delivery of documents.
6. Our IT department has upgraded our Economic Interest Statement system and starting this year we are scanning all EIS documents.
7. Devnet is working on a new funeral home billing program which will be more efficient than the program we now use.
8. Due to the State mandates on security paper we have found it necessary to designate individual printers for each document type.

## **Verification of Identity:**

### **In Person:**

Must have either a valid driver's license, state ID, passport or Mexican Matricula card if none of the above three items – one with their signature (not personal letters, etc.) 2 items with their name and current address.

### **By Mail:**

All mail requests must be signed, and a copy of the ID enclosed and the documents must be sent to the person making the request; if they have a legal right to the document. (We check the signature on the request against the signature and address on the identification). Of course any fraud through the mail becomes a federal crime.

### **By Credit Card:**

### **VitalChek:**

VitalChek does the identify verification; if the customers passes the verification test the order will be in our work queue. (If not the customer would fax us a copy of their ID along with the order confirmation form with their signature). VitalChek does not make the determination if the person has a legal right to the document – we do.

Why a person cannot just come in and ask for their spouse's birth certificate – People can have same last name and not be related or related but does not have a legal right to the certificate. X spouses do not have a legal right to the birth certificate (which is why we ask for a notarized letter from the spouse).

### **Death Certificates:**

Almost anyone can purchase a death certificate if they have a personal or property right interest in the document or be the spouse or family member. They

must have proof that they are related or paperwork showing their need for the document. This is especially important for recent deaths.

### Marriage License

Anyone 18 or older may purchase a certified copy of a marriage license but not the application – only the bride or groom can get the application. (older licenses may have the application on the back – in this case we have no choice - I think it is grandfathered in.)

\*All persons must be 18 to get a certificate except an underage mother – she can get her child's but not her own.

## SCANNING AND INDEXING

For the years 1855-1951 we have a total of 184 Old Birth Certificate Folders with an average of 732 documents per folder. This totals about 135,000 documents. (appx . 134,688 Total). We've indexed and Scanned the years 1855-1915 and 1941-1951. We've yet to finish Indexing and Scanning the years 1916-1940.

So far...

Indexed 94,428 of 134,688 documents ...leaving 40,260 left to Index  
Scanned 86,376 of 134,688 documents...leaving 48,312 left to Scan

129 of 184 documents Indexed, leaving 55 left to Index  
118 of 184 documents Scanned, leaving 66 left to Scan

For 2009 we Indexed 16,070 documents, and Scanned 18,889 documents

So Far in (September) 2010 we've Indexed 11,258 documents, and Scanned 14,682 documents

The above totals do not include Marriage License, Death, Notary, and EIS documents. All marriage licenses, Death, and Notary signatures filed in Kane are scanned and starting with 2010 all EIS statements are scanned.

The totals are for births, deaths, and marriages that occurred in Kane County from 2002 through August 2010.

	Births	Deaths	Marriages

# KANE COUNTY CLERK TAX EXTENSION

KANE COUNTY, ILLINOIS

OCTOBER 4, 2010

## Tax Department Accomplishments

John A. Cunningham was instrumental in getting the Devnet Tax Program implemented in 2004. This program connected the County Clerk's Office, the Supervisor of Assessments Office and the Treasurer's office together to assess, extend and collect the real estate property taxes in Kane County.

This program cut the tax extension time in half allowing much of the preparation work to be inputted into the system throughout the year rather than just weeks prior to extension. The program has trimmed time in the redemption process of the real estate taxes allowing staff to be reduced.

The Devnet system stores past years after extension. Twenty years of past taxes have been converted from micro fiche to CD's. Now customers looking for past years taxes can conveniently look taxes up on the computer. At present there are thirty years of past taxes available to the public on the computer.

Our website has numerous real estate tax reports for public viewing, allowing the taxing districts, researchers and bond companies to easily access the information they require without physically coming to our office.

Monthly meetings between the three offices, an IT representative, a civil Assistant State's Attorney, a representative from the Township Assessors and a representative from Devnet Inc. were implemented and are held to discuss various aspects of the real estate tax process and provides insight as to where each office in the tax cycle.

# KANE COUNTY CLERK ELECTIONS

KANE COUNTY, ILLINOIS

OCTOBER 4, 2010

## **Election Department Accomplishments**

### **Equipment**

In 2006 Kane County implemented the use of the Hart eSlate electronic voting system in compliance with federal law moving away from the punch card system. In 39 days after the final approval was given, the Kane County Clerk's office trained both in-house personnel and Election Judges on the use of this equipment. The new devices were successfully deployed for the first time during the March 2006 General Primary.

Since that time outreach efforts have continued to be successful in raising both the confidence in and the comfort level of the voters of Kane County with this new method of casting their ballots.

### **Vote Centers**

The creation of Vote Centers, previously referred to as Polling Places, has been a major focus of the Kane County Clerk's office. There are 228 precincts in Kane County served by 99 Vote Centers on Election Day.

A consolidation of polling locations (not precinct line changes) was accomplished in Elgin in the February 2008 Primary and continued in the April 2009 Consolidated Election. This was extremely successful and completely met the needs of the residents of this township. It streamlined delivery and set up of equipment, allowed more Election Judges to network to solve the challenges they met on Election Day.

By implementing the use of Vote Centers county-wide, we have maximized efficiency. As we complete this process it will give us the ability to utilize staffing to handle today's technology and continue to implement new processes to better serve the citizens of Kane County.

### **Early Voting**

Early voting was also mandated in 2006 and Kane County quickly became a leader in offering early voting opportunities to its residents. With the number of suburban households who work long hours or commute to the city, it is very important to ensure that convenient locations and schedules for voting are available. Voters from one end of the county to the other have daytime, evening and weekend hours available at locations convenient to their homes or workplaces.

### **Election Judges**

The Kane County Clerk's office maintains a vast database of individuals who wish to serve as Election Judges. This is comprised of people nominated by the two major political parties, others who volunteer to serve and contacts made by the County Clerk's office.

**QUICK FACTS  
KANE COUNTY  
GENERAL ELECTION  
NOVEMBER 2, 2010**
