

Job Title: Electronic Technician

Company: Richardson Electronics, Ltd.

Type: Full Time

Job Description Under general supervision performs electro-mechanical assembly, testing and/or troubleshooting of all department assemblies and components, including but not limited to Semco *legend* type SCR and Diode assemblies, RF type assemblies and components as well as high power microwave components. Technician is expected to work independently to achieve the desired results.

Job Responsibilities:**Essential Job Functions:**

- Read and interpret schematics and blueprints, troubleshoot circuits, and help develop procedures for the assembly and test of the product.
- Assists engineers in the development and building of prototypes and/or test equipment used in the general production of department components.
- Set up and run experiments to compare operational parameters between competing units, and our own design products.
- Assists in other electronic technician areas such as calibration of equipment under ISO9001, programming PLC's, development of semi-automatic testing procedures, etc.
- Assemble and testing of microwave generator products, Siemens medical products and RF type electro-mechanical assemblies.

Non-essential Job Functions:

- Assist with assembly of other Electro-mechanical type products.
- Perform other function outside of normal technical areas, when required.

Supervisory Responsibilities: None

Qualification Requirements: Formal technical training in electronics, preferably microwave design and microwave measurement systems, as well as troubleshooting circuits. Employee must have 3-4 years prior electromechanical assembly experience. Be able to properly operate basic tools to help in the prototyping and pre-production runs for new and/or developing products. Must be able to read and interpret schematics and blueprints. Experience in an ISO9001 company is highly desirable. Must be able to lift 50lbs and sit or stand for long periods as needed.

Working Environment: Clean well-lit air-conditioned electronic assembly area. Some stations ESD safeguards apply. Some testing may require use of lethal voltages and currents, so compliance with safety procedures is crucial.

About Richardson Electronics: Richardson Electronics, Ltd. is a leading global manufacturer of engineered solutions, power grid and microwave tubes, and related consumables; power conversion and RF and microwave components including green energy solutions; high-value replacement parts, tubes, and service training for diagnostic imaging equipment; and customized display solutions. More than 60% of our products are manufactured in LaFox, Illinois, Marlborough, Massachusetts, or Donaueschingen, Germany, or by one of our manufacturing partners throughout the world. All our partners manufacture to our strict specifications and adhere to our supplier terms and conditions. We serve customers in the alternative energy, healthcare, aviation, broadcast, communications, industrial, marine, medical, military, scientific, and semiconductor markets. The Company's strategy is to provide specialized technical expertise, and "engineered solutions" based on our core engineering and manufacturing capabilities. The Company provides solutions and adds value through design-in support, systems integration, prototype design and manufacturing, testing, logistics, and aftermarket technical service and repair through its global infrastructure. More information is available at www.rell.com.

Equal Opportunity Commitment: Richardson Electronics is an international organization with offices worldwide. We are committed to fostering a workplace where all employees have equal opportunities to succeed, grow, and contribute. We believe in creating an environment where every individual is valued, respected, and supported. By promoting fairness,

inclusivity, and a culture of mutual respect, we ensure that our employees, customers, and the communities we serve can achieve their goals. Our ability to bring together individuals with diverse skills, experiences, and perspectives is essential to our continued global success.
